

WORK STRESSES NEED FOR STATE RECLAMATION AID

Interior Secretary Discusses Many Phases of Policy in Letter to Western Senators

(EXCLUSIVE DISPATCH)

WASHINGTON, Jan. 25.—The necessity for State cooperation in future reclamation projects endorsed by the Federal government is stressed in an important letter sent by Secretary of the Interior Work today to twenty-nine Senators representing Western States.

Drawing attention to the fact that Congress in its session last year enacted a law requiring States to aid in the settlement of reclamation projects and that the House of Representatives has again approved this principle, the Secretary asserts that such legislation is essential to the success of such projects.

His letter, in which he discusses other aspects of Federal-State cooperation notably that which embraces Federal aid for highways, follows:

"The Federal government's work was, and is, to develop new communities in a new country. It has done this to a gratifying degree but along with the large increase in farm population and wealth in the West there has been a story of hardship and anxiety of settlers, with loss of time and effort and some times of all the capital brought with them because of inclemency and because their meager capital could not make the farm ready for cultivation. A proper system of settlement would have averted these distressing humors."

"Congress, one year ago, passed legislation attaching to bills for new projects a clause requiring the State in which a new project is proposed to contribute \$100,000. The House has again approved this feature in the pending Interior Department appropriation bill. This legislation in my opinion is vital to the success of the project."

POLICE APPROVED

"Other countries realize that the return of money invested in canals and irrigation projects is a return of the land, and have approved the policy. Without assurance of aid in putting people on the land, new settlers will be difficult to attract and the high cost of irrigation works must be repaid. It is now a belief that no proposed irrigation project is feasible without the moral support that financial obligations of States will bring to the project."

"It has been urged that constitutional objections or financial inability would prevent the States from furnishing this aid, but under the co-operative legislation for road building, the Senate, which under the operation of the Reclamation Act have contributed \$144,405,399.30, as against \$142,867,043 by the Federal government, an increase of a table giving these figures.

"A single year's contribution by the fourteen reclamation States for public elementary and secondary

SHIPS BATTLE FIERCE STORM

(Continued from First Page)

crew of forty men, reported by wireless today, that he had driven his ship, a two-decked steamer, ashore after standing alongside in a blinding snowstorm for nine hours.

The fate of the Antinoe is unknown. She may be drifting at the mercy of the waves, or she may be at the bottom of the sea. Either fate is possible, with the odds in favor of Davy Jones' locker, for the Antinoe was having a hard battle to keep afloat when last seen from the bridge of the President Roosevelt.

All of her boats were gone, crushed by the tumbling wash. No hatch amidships was reported standing in the transom and had no way of keeping the water out. The fireroom was knee deep with water.

DECKS SWEEP CLEAR

Apparently nothing could be done on deck. The lifting seas sweeping across the steel hulk and the unleashed winds made it impossible for anyone to make a safe footing.

On the bridge the officers peered through the unchanging curtain of thick white fakes as the President Roosevelt bobbed like a few hundred feet above.

Aft, under the poop deck where the steering machinery grows as the propeller twists in the icy water, the crew sat listlessly when the world was the pump.

Capt. Fred reported he came alongside at noon yesterday. A terse message gave the high spot of the situation:

"8:20 a.m. M.T. (Greenwich mean time) Picked up H.O.S. British steamship Antinoe. Proceeded and arrived alongside noon Sunday, 24th inst. Weather foggy. Heavy snow and cold west gales. High seas. Remained at anchor until 9 p.m. Then I lost sight of her in heavy snow squall. Am still in vicinity searching for her."

"Her No. 3 hatch is stove in. All boats gone. Water in fireroom and radio out of commission. Estimated to be 100 miles west of San Francisco, latitude 33 deg. west. (Signed)

GONE AT DAYLIGHT

The radio apparently went out of commission after the operator had apprised the skipper of the condition of his own ship. At 9 o'clock, then, last night, with the sea still high, the crew, while eating aboard the President Roosevelt, were eating their dessert—the Antinoe passed out of view of the liner's officers.

Some slightists of the President Roosevelt prowled the darkness in vain. The snow blew in a horizontal shower so thick it made vision beyond a few yards impossible. Above the voice of the gale sounded the sharp, shrill, appealing call of the Antinoe's sirens. If it sounded at all, never reached those on the President Roosevelt.

So, throughout the night the President Roosevelt lay there, a hundred miles off Laredo, bathed in snow and icy winds, awaiting dawn and the possibility of finding the ship she had gone to seek.

ARIZONA RIVER FIGHT GAINS

New Dissensions Spring Up Over Methods to be Used in Protecting Rights of State

(EXCLUSIVE DISPATCH)

PHOENIX, Jan. 25.—As reflected by the State press, public sentiment in Arizona concerning the Colorado River appears to be undergoing fresh divisions and subdivisions. The administration says that "Arizona is being robbed of her heritage" still is sounded and the doctrine of "hate your neighbor" still seems popular in political circles.

But the original proposition that divided the State into compact and anticompetent elements, has been covered up in dissensions over methods that should be adopted to assure Arizona's rights.

There has been a decided split between the extreme compacters who subscribe all else to the highline canal, with its rosy vision of irrigation of exactly 3,500,000 acres of land yet unsurveyed and lacking altitude benchmarks.

One particular observed: "Gov. Hunt never was a highliner. It only happened that the highliners were men who had been his political friends in the past and who helped boost him into office. He was a scoundrel and therefore never had publicly opposed the scheme."

FAR FROM PLEASED

The highliners are far from pleased with the progress that has been made by the lower-level conferences and especially distillate concessions made by Gov. Hunt's committee, declared "paving the way for ratification of the compact and for the development of a compact scheme for the building of the Boulder Canyon Dam and the Dismond Creek Dam."

The highline Association president, Fred T. Colter, has written in this section, "powerful influences," of "throwing away our vested rights," of "unfair division of the water," of "selection of damsites by project officials" and of "relinquishment of the right of prior appropriation." The "prior appropriation" appears to come of the scheme for the building of the Boulder Canyon Dam and the Dismond Creek Dam.

The highliners are far from pleased with the progress that has been made by the lower-level conferences and especially distillate concessions made by Gov. Hunt's committee, declared "paving the way for ratification of the compact and for the development of a compact scheme for the building of the Boulder Canyon Dam and the Dismond Creek Dam."

MUSEUM TO GET DEADLY ARROW**Shaft Killed Kin of Texas Pioneer****Lad Kept Souvenir and Avenged Brother's Death****Old Indian Fights in Fannin County Recalled**

(EXCLUSIVE DISPATCH)
SAN ANTONIO (Tex.) Jan. 25.—Indian massacres, heroism of the early Texans and a pioneer settler's oath of vengeance combine to make the historical background of a poisoned Indian arrow which is to be donated to the museum in the Alamo by Robert Johnson, local historian.

The arrow, which has been in the Johnson family ever since it struck down Johnson's uncle nearly a century ago, is made of light cane, with a steel tip bound securely. It was found in a hollow several times a year on hunting trips. The Comanches would

WHO IS THIS MAN COOLIDGE?**(BY A. P. NIGHT WIRE)**

OSHKOSH (Wis.) Jan. 25.—Freshmen in the Oshkosh State Normal School have a slightly higher intelligence grade than college freshmen who took the same test, but half of them did not know the name of the first book of the Bible, and one-fifth mis-spelled the name of President Coolidge.

"Jenesis," "Genesis" and even "Moses" and "Exodus" were titles given the first book of the Bible.

Others designated it as "Holy," "Coolige," "College," "Coolege," "Coolidge," "Coolig," "College" and "Colige," were among the spellings of the President's name.

order that death might result from any wound, however small.

Johnson is a son of the famous "Uncle Sam" Johnson, an early settler in Fannin county, who was known for his skill as an Indian fighter and for who participated in the Battle of San Jacinto. Anthony Johnson, father of "Uncle Sam," came to Texas in the early settler's period and settled in Fannin county, constructing a simple house of what is still known as the Anthony Johnson place.

The stockade proved to have been built directly in the path of the Comanche Indians who came southward down the Colorado River, several times a year on hunting trips. The Comanches would

BETTER CHURCH ART REQUESTED**National Campaign Launched to Raise Standard****Chicago Pastors Start Move for Protestants****Surroundings and Service Will be Bettered**

(EXCLUSIVE DISPATCH)
CHICAGO, Jan. 25.—Pastors and representatives of 1896 Protestant churches in Chicago today enlisted in a national campaign for more sacred art in religious services as against "the growing tendency toward tawdry theatricalism."

A resolution backing the campaign unanimously was adopted at a joint meeting of the Council of Religious Instruction of the Chicago Church Federation and the union ministers after Prof. H. Augustine Smith of Boston University and a former Chicago choir director, Dr. Ernestine, declared the campaign that American churches are wasting \$9 per cent of the \$700,000,000 spent annually on religious music.

LACK OF IDEALS

"This wastage is not due to poor playing or poor singing, but to lack of ideals," Prof. Smith told the meeting. "Most of the time the church lies in unchurchly architecture and unchurchly worship procedure. The vestibule is more often a bustling vanity fair. Ushering is oftentimes an Atlantic City boardwalk.

"Choirs struggle in and with no vestments and the women half-crowned; what better time during the organ prelude than to study the new hats? What the organ does?" asked Prof. Smith. "While the usual Protestant church sermon is good, the rest of the service could be greatly improved by a more dignified, refined ritual."

"While I do not agree with the methods of Greek, Roman Catholic and Jewish faiths, I admire their beautiful services, and I think our Protestant church services could be improved greatly by adopting some of these rituals."

NEW YORK, Jan. 25.—The Misses Markwart and Clara Owens of 218 William street, Long Island City, who live a retired life, were questioned by Detective Albert Werle of the Hunters Point Station as to their knowledge of the family of Albert Bernake, the "Hermit of Dutch Kills," who was found dead in his shack at 295 Ely avenue, where he had lived as a recluse for twenty-five years.

According to the detective, the hermit, who was about 60 years of age, left a note indicating that he had left some money and some debts to property on Eastern Long Island in the care of some friends. These friends are not his real friends, it turned out, and there were the only persons he ever talked to except when he was working.

A brother of Bernake is believed to live in New Jersey, while a sister living in Germany, the hermit's native country.

It was the hermit's dream to have a real home some day and to this end he had bought the property at Long Island City, which cost him the nickels and dimes which he earned whenever he could find odd jobs in the neighborhood.

ALLIANCE NEEDED

"But for the majestic and dramatic themes of religion the world's output of masterpieces in the fine arts would be greatly reduced. The church should cultivate these masterpieces. There should be a more intimate and holy alliance between religion and religious art as was the case when the greatest of these masterpieces were produced."

"Jazz music and the more sensational type of worship service which has made its way into many a modern church should give way to the more formal and spiritual which was appreciated by the worshippers of the Christian centuries gone by and the era of the Psalms."

ARCHITECT OF CHURCH BRINGS SUIT FOR PAY

STOCKTON, Jan. 25.—Robert H. Orr, architect, has brought suit in the local Superior Court against the First Christian Church to collect \$473 asserted to be due as an architect fee on contracts for the new Christian Church recently dedicated here. Orr avers that the church officials agreed to pay him 10 per cent of the cost of the building, which is estimated at \$4,730.

The church cost \$129,758 and Orr says that he has been paid only \$3000 out of a fee of \$7757.

evidence of crops grown by the Jesuit and Franciscan monks at the early missions, has been established by George W. Hendry, assistant professor of agronomy in the college of agriculture, and associate agronomist in the experiment station, University of California, working in association with Prof. P. Kelly, assistant of the State Department of Agriculture.

While there has been documentary evidence as to the nature of the crops grown, it was not until Prof. Hendry and Miss Kelly obtained bricks taken from mission walls and examined their contents, that definite knowledge was obtained as to the crops and varieties.

Miss San Joaquin de Padua at Jolon, and Mission La Soledad in Monterey county; Mission San Fernando, in Los Angeles county; Mission San Juan Bautista, in San Benito county; Mission San Francisco de Solano, at Sonoma; Sonoma county; Rancho El Socorro between 1885 and 1890. Carrots, garden peas, and watermelons were found, as was an olive of

the olive of the missions.

Between 1897 and 1787, Jesuit monks built a chain of fifteen missions in the peninsula of Lower California and between 1767 and 1776 they extended northward to Sonoma by the addition of twenty-one Franciscan missions. These missions established the first civilization in the 110,000 square miles of territory and through them were introduced into California the first cultivated fruits, vegetables and field crops. The Jesuits are supposed to have introduced the first grape, citrus, pomegranate, olive and date into Lower California, and the Franciscans are said to have added apples, peaches, plums, quince, cherries, walnuts, haricots, maize, artichokes, horse beans, frijoli beans, flax, hemp, cotton, peas, tobacco, onions, peppers and melons.

The investigators took adobe bricks from walls of the missions and ranchos immersed them in water for a few hours and found that the seeds and plant

CONSTRUCTOR OF TODAY BEST

Modern Builder Deemed Peer of All Time
Work Far Surpasses That of Egyptians
Early Achievement Considered Outstanding

(BY A. P. NIGHT WIRE)
MINNEAPOLIS (Minn.) Jan. 25.—Pharaoh and his slaves have had much press-aguing as general contractors extraordinary, the opinion of W. O. Winans, Minneapolis, who has just reduced fifty years of railroad and other construction work.

The builder of the pyramids notwithstanding, Winans believes it can be shown that modern industry can do better.

The builder is accused of short space of time what the ancient kings and their armies required a lifetime to accomplish.

In 1884, when the steam engine was a thing unheard of and the wheelbarrow was the chief motive power, the contractor supervised a construction job which took three months to build and three times as much material as went into one of the great pyramids was excavated in a period of seven months of the outstanding achievement.

For the extension of the St. Paul, Minneapolis and Manitoba road from Minot, N. D., to Fergus Falls, Minn., in 1885, some 500 men and 2,000 teams were used in the laying of 645 miles of track across the prairie, the greater 200 miles of roadbed being built of stones and wood structures.

The contractors organized forces like an army, to haul by hand, every piece of timber and supplies across the plains.

One expense item included the building of a bridge for the track layers reached a sum of eight miles a day, costing good rate even at present.

FLOUR MILL BURNED

PLAINVIEW (Tex.) Jan. 25.—The Harvest Queen Flour Mill, Plainview, owned by A. G. Cook, was destroyed by fire. It was damaged to the extent of \$10,000. Grain and flour valued at \$10,000 were stored in the mill when burned. The Santa Fe Railroad sustained a loss of about \$10,000 when six empty freight cars and two carloads of grain were lost.

MIL CAVE RADIO PROVE SUCCESS

(A. P. NIGHT WIRE) Jan. 25.—At a distance of a quarter of a mile between radio stations made in Colossal Cave, new stations were picked up very far apart. These stations are said to be more audible than the original stations because of the effect of the earth.

It is believed this exper-

imental station will be continued in connection with Palm Beach. Static is entirely eliminated, but the sound is pronounced.

STATE MAY YIELD RUBBER

Many Plants and Shrubs Experimented With in Effort to Establish Commercial Production

(BY A. P. NIGHT WIRE)

SACRAMENTO, Jan. 25.—Balloon tires with a California fig flavor are a possibility if British rubber interests maintain the present high price of para long enough. The possibility is admittedly remote, but it is cited by State Department of Agriculture officials as an illustration of the fact that there are several hundred varieties of trees and plants capable of producing rubber.

The fig tree commonly grown

in California is one of them. More important, however, in the eyes of experimentors now working on the problem of rubber production in the United States, are a milkweed easily grown in desert regions (the *Asclepias subulata*), and the Mexican guayule bush.

Commercial rubber of a grade inferior to para rubber, but still very useful in the manufacture of certain articles where a high degree of elasticity is not required, has been produced from the guayule, which as early as 1915 was harvested in some quarters as "the last straw." It is now being developed to revolutionize the rubber industry.

The guayule, desert milkweed, or some other plant capable of thriving in arid regions, should prove commercially valuable for rubber content, the course, would be of immense importance to the Canadian Pacific.

Expenditures will be great, but the Canadian Pacific's resources have improved

during the past year, so that the debt was \$1,000,000,000, while the December 31, 1925, was \$1,000,000,000.

The contractors organized forces like an army, to haul by hand, every piece of timber and supplies across the plains.

One expense item included the building of a bridge for the track layers reached a sum of eight miles a day, costing good rate even at present.

BANK SUED IN CHECK REFUSAL

Claimant Asserts Credit Damaged as Result

Two Vouchers Said to Have Been Turned Down

Sum of \$3000 Asked in Court for Reparation

(EXCLUSIVE DISPATCH)

SANTA ANA, Jan. 25.—A bank that refused to honor a \$12 check and returned it with the marking: "Not sufficient funds," today was sued for \$3000 damages by the check writer, S. C. Shepard filed the damage action in Superior Court against the First Commercial Bank of Orange. Refusal of the bank to honor two of his checks, one for \$12 and another for \$10, injured his "good name" and reputation and credit, to the extent of \$3000, he asserted. In addition to that amount he asks judgment for \$50, the sum he claims he had on deposit in the bank when his checks were rejected there.

Attorney O. A. Jacobs of Santa Ana represents Shepard in the action.

The suit is unique in local court annals. In his complaint, Shepard asserts that he deposited \$75 in the bank last November 14. On November 20, with a balance of \$50, he wrote a check for \$12 in favor of Mrs. Ella Robinson, boarding-house keeper in Orange. The bank is said to have refused to honor the check. The refusal, Shepard asserted, injured him to the extent of \$1000. Two days later, having called the bank's attention to the matter, he wrote another check for \$10, also in favor of Mrs. Robinson, who endorsed the check to N. J. Whitney.

The claim in the second case, fate of his predecessor, Shepard states.

"The second refusal added \$2000 to his damage claim. Since he appears to have no access to the \$50 account he claims to have, Shepard asks the court to order payment of \$50 to him by the bank.

Ranchers Send Delegation to Owens Valley

(LOCAL CORRESPONDENCE)

ZELZAH, Jan. 25.—Glenn Allard, Fred Cooper and Mort Reece, are part of a delegation that will leave here tomorrow for a trip of inspection over first-hand study of the water situation to determine, if they can, what the prospects are for San Fernando Valley farmers during the coming spring and summer.

All three have been close students of the irrigation water supply as affects this part of the valley. Late last spring and during the past summer the Zelzah district, and other parts of the western end of the valley suffered some what through lack of irrigation water.

HERO OF QUAKE GETS HONORABLE MENTION

(By a "Times" Staff Correspondent)

PASADENA, Jan. 25.—"High courage, foresight and devotion to duty" on the part of Charles H. Woods, following the Santa Barbara earthquake last July, was given the highest award by a private operator in the Arlington Hotel, have been recognized by the city of Santa Barbara in a diploma sent to Woods. Woods, now employed as telephone operator at the Hotel Green here, was working in the basement of the Arlington at the time of the first quake, and performed remarkable services in rescue work. The diploma expresses the thanks of the city and is signed by Mayor G. H. Aders.

TRIES TO ENTER BANK THINKING IT SALOON

(LOCAL CORRESPONDENCE)

GLENDALE, Jan. 25.—Mistaking a bank on the corner of San Fernando and Grand Boulevard for an old-time saloon, Edward Miller, 1256 Figueroa Street, Los Angeles, into trouble when he was arrested by the police officer after the employee of the house had gotten him off for being a drunk. He was taken to the scene in a car, but found no one who looked like a hold-up man. A search of the neighborhood resulted in Miller's arrest. Miller was declared to be carrying a bottle of alcohol, a bottle of olive oil and a jar of vaseline when arrested.

Judge Loring sentenced Miller to pay \$50 or serve twenty-five days in jail. Miller chose the latter alternative.

CANAL RIGHT PURCHASED

Lindsay-Strathmore District Takes Over New Stretch of Merryman Ditch

(EXCLUSIVE DISPATCH)

LINDSAY, Jan. 25.—An additional ten and a half miles of the Merryman Canal, which takes water from the Kaweah River at Terminus, has been purchased by the Lindsay-Strathmore Irrigation District and a force of fifty men is now enlarging and repairing the canal.

Also it is announced that the six miles of lower canal originally purchased from the Merryman district will eventually be just purchased. Ultimately, this canal will be connected with the upper Lindcove reservoir site.

Supt. George B. Traeger, resident engineer of the district, declares the present force will be increased soon and materials in the canal will be used to repair the canal.

Judge Loring sentenced Miller to pay \$50 or serve twenty-five days in jail. Miller choosing the latter alternative.

BAKERSFIELD SUBWAY TO BE READY IN APRIL

(EXCLUSIVE DISPATCH)

BAKERSFIELD, Jan. 25.—Bakersfield will have her 150,000 Union Avenue subway at the crossing of the Atchison, Topeka and Santa Fe Railroad tracks by the middle of April. Actual work on the structure, laying of piles and false work will be started next week according to William White, local agent for the Santa Fe. After twenty-five days for false work construction and the remainder of a seventy-five day period for the pouring and setting of concrete, the opening of the subway should be made about April 12.

SOUTH GATE ARRESTS YIELD PROFIT TO CITY

(LOCAL CORRESPONDENCE)

SOUTH GATE, Jan. 25.—The annual report of the police department has been presented to the City Trustees, which shows that during the year 1925 there were 1662 arrests made by the department, for city, State and national offenses.

There were 159 violations of city ordinances, while 572 violated the liquor laws.

The expenses of the department reached approximately \$16,000 and the amount collected in fines \$16,552 for liquor violations, while fine for city-ordinance violations reached \$7200.

DAUGHTERS INSTALL

(LOCAL CORRESPONDENCE)

LANKERSHIRE, Jan. 25.—Officers of the local chapter of Daughters of Civil War Veterans, recently installed in the Wadsworth Hall, by members of the Los Angeles chapter. Mrs. H. M. Seeberger is the new and Mrs. Anna Taylor, the retiring president. The latter was the first head of the local organization, which was formed through her efforts.

STOLEN SILVER HUNTED

(STOCKTON, Jan. 25.—While Delmar Knox of Pittsburg, Pa., spends twenty-five days in jail at New York, he will be assisted by Stockton police with Newman authorities. Trauer will investigate the manner in which Knox came into possession of a large quantity of silverware, said to have been stolen from this city.

The substantial type of cement construction used at present on

ROTARY TO SPREAD IDEALS

District Governor Tells Inglewood Club of Plans to Further World Peace

(LOCAL CORRESPONDENCE)

INGLEWOOD, Jan. 25.—Further realization of world peace through the extension of the principles of Rotary in foreign lands, now ready for its message, is in contemplation by Rotary leaders, it was declared here today by Tom Bridges of Oakland, district governor of Rotary International Second District, addressing the Inglewood Rotarians on his first official visit.

Germany is one of the countries now ready for Rotary, said the speaker, and, according to the belief of those advocating this extension work, if there had been fifty Rotary clubs in Germany before 1914, there would have been no war.

The district's governor's address was supplemented by a brief talk on the sixth object of Rotary, world peace, by Rotarian Walter E. Stern of the local club, who pleaded for the World Court and denounced what he termed, "trucking politicians" for their opposition to this tribunal and the United Nations participation in its deliberations.

A fund of about 50 cents a member, it is planned, will be raised by Rotarians for extension work in other countries, according to Mr. Bridges, which will detract from the spending of sending organizers imbued with Rotary principles, and speaking the language, to the various nations selected. Mr. Bridges was introduced by City Attorney Clyde Woodburn, president of the club.

CRASH BONDS URGED

Pasadena Organizations Warn of Election Apathy Danger

(By a "Times" Staff Correspondent)

PASADENA, Jan. 25.—Combining in an effort to induce a record vote for the \$100,000 bond issue to relieve victims of the New Year's Day grandstand accident here, the Chamber of Commerce and a large number of other civic organizations issued statements today warning of the public of the dangers of apathy toward the election next Friday.

"Sentiment in favor of the bond issue seems to be practically unanimous in the city," Dr. W. Williams, chairman of the chamber's special committee, asserted, "but we must have an overwhelming majority if this measure is to carry conviction."

"As would be inevitable when hundreds of people are injured, eight killed and others crippled for life, many of them are entirely dependent upon us for their existence. Many of these people are in distressing financial shape, it is a solemn duty that Pasadena, regardless of the legal status of the case, cannot ignore."

KNIGHT RANK GIVEN CLASS BY PYTHIANS

(EXCLUSIVE DISPATCH)

HANFORD, Jan. 25.—At one of the largest gatherings of members of the Knights of Pythias ever held in the San Joaquin Valley, in which representatives of ten lodges from different cities participated, a class of fifteen candidates last Saturday night at the Municipal Auditorium in this city. The opening ceremony was conducted by Fredrick Jones, Past Grand Vice-Chancellor; John F. Taggart of Chico, Grand Trustee, and John Linney of Santa Cruz, prominent in the order, were present.

COUNT VOTES IN HOT VENTURA ELECTION

(EXCLUSIVE DISPATCH)

VENTURA, Jan. 25.—County officials are today counting the ballots in the third election which by a vote of 250 to 117 carried a \$50,000 bond issue for the building of a new grammar school in the city. The voting took on the aspect of a frantic race, as an armed officer was detailed from the Sheriff's office to keep order. No disorder resulted, though there was much challenging of voters.

He paid tribute to Walter G. Raymond and G. G. Green, pioneer among local hotel men, who, he said, started the great tourist movement which resulted in the growth and development of Pasadena.

NEW PACKING-HOUSE PLANNED BY COMPANY

(EXCLUSIVE DISPATCH)

FULLERTON, Jan. 25.—Tentative plans for a new packing-house were laid by stockholders of the Golden Gate Fruit Company at their annual meeting here. The company is now using the old Benchley plant, but since this building has been purchased by the Edison Fruit Company, other arrangements must be made for handling its products next year. Officers elected included W. L. Hale, president; I. B. Smith, vice-president, and S. W. Smith, secretary-treasurer. Directors are W. L. Hale, J. W. Smith, William Kroeger, J. C. Shepherd, A. G. Oswald and L. B. Gaskell.

SATICOCY MAN FOUND DEAD UNDER CULVERT

(EXCLUSIVE DISPATCH)

VENTURA, Jan. 25.—Francis Sandoval, 24 years of age, of Satoccy, was found dead face down in the San Joaquin River near his home, San Joaquin, Calif. Sandoval, who was subject to epileptic attacks, is believed to have fallen into the water in the course of such an attack. There were no signs of violence.

NEW SCHOOL UNITS IN POULTRY COLONY

(LOCAL CORRESPONDENCE)

OWENSMOUTH, Jan. 25.—The new school units in the Weeks Colony on Winnietta Avenue and Lanark street, will open by February 1. The boundary lines will be marked by blue poles by Nordhoff street, the Southern Pacific, Tamp and Corbin streets, South Sherman Way, Satoccy and De Soto streets. All children in the area, up to the sixth grade, will start the next semester in the new school. Miss Anna Sherry has been appointed principal. The school will open with eighty pupils, twenty being transferred from the Keedea school and sixty from Owensmouth.

BAKERSFIELD SUBWAY TO BE READY IN APRIL

(EXCLUSIVE DISPATCH)

BAKERSFIELD, Jan. 25.—Bakersfield will have her 150,000 Union Avenue subway at the crossing of the Atchison, Topeka and Santa Fe Railroad tracks by the middle of April. MAN ADMITS HE BEHEADED BODY*Philadelphia Confesses to Dismembering Woman**Denies Slaying Her in Office and Tells of Suicide**Revelation Follows After Hours of Grilling**(By A. P. NIGHT WIRE)***PHILADELPHIA.** Jan. 25.—David L. Marshall, a chiropractor, confessed today that he had dismembered the body of Anna May Dietrich, bobbing and unsewed. Marshall denied that he had murdered the 35-year-old Norwood milliner, declaring she had taken poison in his Philadelphia office because she had been jilted by a wealthy New York man.

A brief half hour before he broke down and confessed, Marshall had bent over and looked straight into the disguised face of the woman in the Media morgue and had said, "I wish she could speak—she would tell you that I am innocent."

The confession came in tumbling frantic words words after the chiropractor had been cross-examined for four hours.

He was taken to Media from his home in Bryn Mawr Heights, which overlooks the ravine where the young woman's head was found wedged under a railroad trestle Saturday, and where yesterday searchers came upon the body of Anna May, whom he had bought last Tuesday, the day she disappeared, to wear to a dance the following night.

GLED ANSWERS

Marshall glibly had answered a multitude of questions in the District Attorney's office, in his own home, in his Philadelphia office, and in the presence of the mutilated body at the morgue.

"Mr. Taylor," he began suddenly, after a tense silence of five minutes, "I want you to promise me one thing—I will take care of my wife and child." Then there was another pause.

"I did it," he cried suddenly. "I don't know why I did it. . . . I was frantic with fear."

Then he told the brief story of the woman's death and the dismemberment and disposition of her body.

"I met the girl Tuesday night outside my office in Philadelphia," he said. "She did not feel very well. I proposed that she go up to my office—I told her the door was unlocked—and lie down. I said I was going out to get something to eat."

FOUND UNCONSCIOUS

"I was gone about an hour. When I came back she was in the bathroom. I ran to her and she was unconscious. The bell went through the roof of the bathroom and when she did not answer, I pushed in the door."

"I found Miss Dietrich unconscious. I tried to raise her but could not. I worked on her until she died."

"Then I became frightened and panicky. I did not know what to do. I knew what I had done and I feared I would be blamed for her death."

"I kept the body all that night in my office. Early next morning I came back and then I cut off the head and legs with a hacksaw and a knife."

"Wednesday night I distributed the body. I forgot the head, having left it in my office when I took away the body and later remembered it Thursday morning and I took a paper that bore the date of September 11, 1924, and wrapped it around the Pennsylvania freight line crosses a series of trestles near Marshall's house. Last night Marshall was questioned vainly until 10 p.m. when he was returned to his home. The police later took Marshall to his office in Philadelphia. They found that his operating room and the women's dressing-room had freshly varnished floors. They found bloodstains in a small closet, a new harness and a bit of bloody newspaper bearing the date of September 11, 1924, the same date as the paper which wrapped the head and also the torso."

KNOWS AS ADMIRER

The chiropractor, known as one of the slain woman's admirers, was under suspicion from the time a Pennsylvania Railroad brakeman told the police he had seen a man throw a bundle away at Naylor's Run, where the Pennsylvania freight line crosses a series of trestles, near Marshall's house. Last night Marshall was questioned vainly until 10 p.m. when he was returned to his home. The police later took Marshall to his office in Philadelphia. They found that his operating room and the women's dressing-room had freshly varnished floors. They found bloodstains in a small closet, a new harness and a bit of bloody newspaper bearing the date of September 11, 1924, the same date as the paper which wrapped the head and also the torso."

"Supongo que muchos de mis lectores no conocen la acusación que tiene el verbo 'doblarse', y la del sustitutivo 'doblar', y la de los adjetivos 'dobla' y 'doblar', que han sido las expresiones que han usado las personas de la campana de la parroquia. Aquellos estudiantes a quienes les dan de nuevo la razón tienen que recordar que 'doblar' es el verbo que designa la campana de la parroquia."

"Supongo que muchos de mis lectores no conocen la acusación que tiene el verbo 'doblarse', y la del sustitutivo 'doblar', y la de los adjetivos 'dobla' y 'doblar', que han sido las expresiones que han usado las personas de la campana de la parroquia. Aquellos estudiantes a quienes les dan de nuevo la razón tienen que recordar que 'doblar' es el verbo que designa la campana de la parroquia."

"También los blancos muebles se dividen en blancos muebles y semovientes. Los primeros, dice la Encyclopédia por NATURALEZA y por ANÁLOGO, existiendo animales que son blancos y sin huesos, por lo que se consideran como blancos los muebles que no tienen partes interiores de animales; III. Todo lo que está unido a un inmueble de una manera fija, de suerte que no puede separarse de él sin quebrantamiento de la parte que lo une al inmueble; IV. Los estatutos, relieves, pinturas u otros objetos de uso o ornamentación colocados en edificios o heredades por el dueño del inmueble, con el fin de que resulte el propósito de unirlo a su mundo permanentemente al fondo; V. Las máscaras, vasos, instrumentos o utensilios destinados por el propietario para el uso de la industria o explotación que se realizan en el inmueble; VI. Los animales que directamente concurren a satisfacer las necesidades de la explotación misma; VII. Los viviendas de animales, palomares, colmenas, casas de pollos o craderos, etcénticos, cuando el propietario los haya colocado o los conserve con el propósito de mantenerlos unidos a la finca y formando parte de ella de un modo permanente; VIII. Los animales que están en las tierras donde han de utilizarse; IX. Las minas, canteras y socavones, mientras su explotación permanezca en el suelo; X. Las concesiones administrativas de obras públicas y las servidumbres y demás derechos reales sobre tierras y casas; XI. Los inmuebles a que están unidos; y en el artículo 236 agrega que se consideran como muebles las rentas o pensiones, sean vitales o hereditarias, siempre una cosa inmueble; los oficios enajenados, los contratos sobre servicios públicos y las cédulas y títulos representativos de los mismos hipotecarios (mortgage loans)."

"La clasificación de las cosas en inmuebles, muebles y semovientes es, acaso, la más importante y trascendental de las que se consideran en la legislación civil, porque es la que más importancia tiene en la administración de la justicia. Esta importante distinción entre una cosa inmueble y otra que es considerada cosa mueble, las rentas o pensiones, sean vitales o hereditarias, siempre una cosa inmueble; los oficios enajenados, los contratos sobre servicios públicos y las cédulas y títulos representativos de los mismos hipotecarios (mortgage loans)."

WHETHER you are one of those who have already visited Barker Bros.' new home—have seen its foyer and perhaps marveled at its impressiveness and simplicity—or whether that pleasure is yet in store for you—it will not be amiss to tell of the thought back of the planning of that entrance. It is the symbol of everything for which Barker Bros. stand. This administrative foyer is the central station of all the resources of talent, experience and merchandise in this store. Its beauty, its simplicity, and its comfort make it ideally the first point of contact between the public and this organization of specialists. It is a pleasant place to meet—to learn the problems of our customers. It is the beginning of hundreds of avenues of service throughout the building. It was designed with regard for dignity—for comfort—just as the reception room of any home would be designed. It is here that Barker Bros. first welcome friends—first learn their needs and plan how to be of greatest service to them.

Barker Bros. again invite everyone to come and meet them in this foyer and to become acquainted with every nook and corner in the store.

THE FREAK OF RING CHAMPIONS
Harry Greb, the only man in the world who believes in the system of training. The "Pittsburgh Windmill" of the middleweight crown, messis Ted Moore, the Briton, in action at Vernon tonight.

**HELEN WILLS BEATS MLE. VLASTO****GREB TO BATTLE MOORE TONIGHT***World's Middleweight Champ Appears at Vernon**Britisher is Primed to Give King Tough Scrap**Winner to Meet Victor of Colima-Lomski Bout*

Harry Greb, part freak and all champion, is the attraction at the Vernon Coliseum tonight. His opponent, Ted Moore, in the ten-round decision scrap, is primed to upset the dope. For Moore has trained for the battle, consistent, diligent, eager to scrape his lost laurels.

The Englishman has lived in a gymnasium. He has had a special trainer, John McFarland, the Greek. He has got up mornings with the sun to do read work. He has gone to bed at 9 o'clock evenings.

"I ain't foolish," says Moore. "Tonight's fight can make me. I'm fighting Greb, middleweight champion of the world. I know he knows the referee is going to give a decision."

Greb has trained differently than Moore. The champion has been to the gymnasium, fights twice the last two weeks. He won both in true Greb style. For Greb has but few real contenders for his title—Tiger Flowers, Ted Moore, Leo Lomski and Bert Colima.

Yesterday Greb did a little work on the ring. McFarland, the Lycra man, not because he thought he needed any tuning up, but because he hoped to

CITY LEAGUE CASABA TITLE AT STAKE*Manual Arts, Hollywood Cage Teams Clash This Afternoon***TOILER LEADER**

Capt. Manley Bowler, Manual Arts forward, is expected to start when the Artisans tangle with Hollywood this afternoon.

Interest in the tilt has reached a

fiery pitch, with a wide range of opinions among prep fans as to the victor. The Artisan gym, which has a capacity of 2,200, is expected to be filled to overflow.

Both coaches anticipated the hand-to-hand game of the year, but at the same time believed their teams have an even chance at victory. Coach Morris Blair, Toiler mentor, announced his squad to be in the best of shape. "We will have no alibis," declared Blair.

Capt. Bill Paige of Hollywood said the same thing in his statement, but stressed the fact even more that there would be no alibis coming from Hollywood in case of defeat.

All of which should furnish a great game with the best team winning. Just which is the best team is a matter of opinion.

As a matter of fact, the superseded the Artisans and put them into the game slightly favorites.

A comparison of the two teams, games gives the Artisans a margin of ten points, but it is doubtful that the winner will have as much as one edge.

Defensively the Toilers appear to have an advantage over the Footballers. In the Franklin game, Hollywood won by a 46-to-5 score, while Manual emerged the winners by a 55-to-2 score.

Offensively the squads rank about even. Lithgow, Shy and Meers Hollywood forwards, rank very well with Bowler, Piper and Stevens. The Artisan backs, including Capt. Manley Bowler, an all-time forward last year, is perhaps the best of the forwards, but Capt. Jim Meers of Hollywood is out.

(Continued on Page 16, Column 2)

HOLLY CAPTAIN

Capt. Jimmy Meers, who will lead the Hollywood High School five against the Toilers in an attempt to retain the prep title,

is the best of the players.

Both coaches anticipated the hand-to-hand game of the year, but at the same time believed their teams have an even chance at victory. Coach Morris Blair, Toiler mentor, announced his squad to be in the best of shape. "We will have no alibis," declared Blair.

Capt. Bill Paige of Hollywood said the same thing in his state-

ment, but stressed the fact even more that there would be no alibis coming from Hollywood in case of defeat.

All of which should furnish a great game with the best team winning. Just which is the best team is a matter of opinion.

As a matter of fact, the superseded the Artisans and put them into the game slightly favorites.

ABE ESPINOSA IS RUNNER-UP*New Yorker Leads Field at Dallas With 298 Card**Smith Annexes Second Texas Tourney in Two Weeks**Willie Hunter, Kirkwood Tie for Fourth Spot Money**TRY A. P. NIGHT WIRE**DALLAS (Tex.) Jan. 25.—MacDonald Smith of New York annexed his second open golf victory in Texas in two weeks by winning the Dallas open championship here today with a 298. Abe Espinosa of San Francisco came second with a 301, and Bobby Cruickshank of Chicago, third, with a 303. Smith won the Texas open at San Antonio last week.**Joe Kirkwood, Australia, and Willie Hunter, Los Angeles, tied for fourth with 305 each. Harry Cooper of Dallas, who won the Los Angeles open recently, took fifth with a 306, and with a score of 307. Al Waterson from Grand Rapids, and John Golden, New York, each shot scores of 309. One stroke behind Bill McNamee of Chicago, who had a 308.**Playing pair golf all afternoon, Smith, with a 71, brought his total for 72 holes to 298 and pocketed \$500 of the \$3,000 grand prize. Espinosa, with a score of second money, was a dark horse. Cruickshank, who placed third, played in the same three tournaments as Smith and McNamee, which attracted by far the largest gallery of the day.**Other low scores follow: Andy Kay, Grand Rapids, 310; Lloyd O'Gorman, Toronto, 313; Larry Nahmias, Chicago, 314; Freddie Walsh, Appleton, Wis., 315; Edward Juig, San Antonio, 320; Tom Boyd, New York, 321; Pat Doyle, New Jersey, and Tom Lally, San Antonio, 322; Jack Forrester, New York, and Stord Long, Galesburg, Ill., 326.**GOLFER STAR HOOPST**Roland R. MacKenzie, Middle Atlantic States golf champion and medalist in the 1925 amateur championship, who is a student at Eureka University, is a member of the basketball team composed of freshmen.***LENGLEN ONLY TITLE BARRIER***Number Two French Player is American's Victim**Placements by Californians Decide Match**Play Fatigues Opponent of National Champ**TRY A. P. NIGHT WIRE**CANNES (France) Jan. 25.—Suzanne Lenzen alone remains between Helen Wills and the championship of France, as the California girl left after a strenuous battle in the finals of the Metropole tournament, defeated M. de Vlaeminck, who ranks No. 3 among the women players in France, in a score of 4-3, 7-5. She now has no opponent worthy of her skill until she meets the mighty Suzanne.**Miss Wills' victory was easier than the score indicated. She played well within her best form, attacking and counter-attacking until threatened than herself applying a little more skill and power and winning with plenty in reserve.**Miss Wills won the first two games, but her opponent recovered matters, later bringing the score to 2-2 all, but the American champion won out three games and was set.**COOLERS WIN**Things looked dark for the Coolers in the second set, with Miss Vlaminck, 2-0, leading.**After a series of exchanges and fighting spirit were reversed and Miss Wills took four games, the set and the match. It was thought by experts that Miss Wills made up for the loss of energy due to her opponent's backhand, which she believed to be as weak as in 1924, when the American girl defeated her in the Olympic. She showed her ability later, by playing away to the baseline corners, and running Miss Vlaminck weary. The French player was so tired after the match that she was unable to go on with Miss Wills in the final of the women's doubles and she received what this be postponed until tomorrow.**Jacques Brugnon, France, who defeated G. H. Mayer in**(Continued on Page 16, Column 3)***GRANGE GETS JUICY CUT***TRY A. P. NIGHT WIRE*

SAN FRANCISCO, Jan. 25.—University of Illinois star receiver, Fred Grange didn't show up on the playing field today, when his professional football team, the Chicago Bears, lost to the San Francisco 49ers, 14 to 8, but he scored two touchdowns. Mr. Grange, revealed to a reporter said that the for-

mer Illinois star received \$100 to \$200 last year as the total efforts of a few nights.

However, Cowen said that the amount of tickets actually sold numbered 22,278, and that the game was put on "at a profit" by the sponsors. Seats sold at prices of \$1, \$2, \$3 and 5.

Both the promoters and the public have become ring wise, in Leonard's opinion, and consequently are more or less able to compete at financial discounts with the promoters of a professional glove-slinging.

Leonard, who is doing a turn in Vanderville here, expressed amazement at reports that one of only ordinary box office attraction, made from \$20,000 to \$30,000 last year as the total efforts of a few nights.

And of noted Freddie Welsh and won the title in 1917. Leonard said, "A week later I fought in Philadelphia as lightweight champion for \$1,000.

RING TOURNEY IS UNDER WAY

Boxers Given Incentive for Some Torrid Milling

Mushy Callahan Signed Up to Box February 12

Schaefer to be ex-Newbie's Opponent at Legion

A gold belt emblematic of the Pacific Coast championship, is to go to the winner of the lightweight tourney now under way at the Hollywood Legion stadium.

Manager Tom Gallery decided yesterday there was no reason why he should not call a "Fox Richard" and give the boys something worthwhile to fight for.

He has arranged with his

orderer a hand-

some circle at the jeweler's

and signed another pair of matches for the tournament. Bill Callahan to meet Sammy Mandell February 6 and Mushy Callahan to tackle

Frankie Schaefer February 12.

The coming Friday Lou

Palus is to meet Johnny La-

mar, giving gallery lightweight

matches three successive

weeks.

Two bouts in the tourney have already been staged, Sammy Mandell beating Teddy O'Hara and Ace Blakely taking a nose decision from Frankie Schaefer.

It is expected that this

week, he will be in the undefeated class with Hudkins and Mandell.

Others to be added to the light-

weight elimination tourney are

Jack Spar, Ed, who gives damage

blistering rounds, the monogram at

Wilmington tomorrow night, and

Tommy O'Brien, who holds a de-

cision over Hudkins.

Callahan's entry, into the tourney may be for only one

night, as his present record

is not good enough to make him cast

for a crack at Lou Vincentino,

Jimmy Goodrich and Rocky

Kane.

However, Gallery is hopeful of

producing an outstanding candidate

in the veterans' section of the

legion's homegrown tourney, a candi-

date that will stick out as a real

rival for the brown that Benny

Leonard laid aside.

RABBIT PUNCHES BY PAUL LOWRY

(Continued from Ninth Page)

mopped up the Orient at the

Jew's own game a few years

back, and became Orient at the

Orient. Wednesday night Lou

Dave has discovered that he

will have as customers every

Nipponer in the city, who

hasn't muscle-bound in the

last month to attend either of

the two big supporters of

Ota grabbed \$2000 worth of

tickets, followed this up with

an order for another \$1000

worth and yesterday Riddle-

groon London, who thinks he

shouldn't have to pay the

box office for discs.

This seems to indicate that

the brown boys are rather

proud of Brother Ota and will

try to back up their claim in

life by sparring and carding

which Brother Dave informs

me is the truth to the letter.

Incidentally, he points out that

the visitor of the Katsunaro-

Kampen bout gets a crack at

Jim London, the good-looking

Greek.

A note from our old friend,

Jack Hurley, in Fargo, N. D.,

tells of the close decision Ran-

do LeRoy, who fought Mushy

Callahan at Vernon last year,

dropped to Pinky Mitchell,

the junior lightweight champion,

in Fargo, the 14th inst.

Jack says the gate drew \$8500

versus \$7500 last year.

"The thing that may interest

you most is that the original

Battling Nelson was here a

week before the bout and wrote

for papers and said

which Brother Dave informs

me is the truth to the letter.

Incidentally, he points out that

the visitor of the Katsunaro-

Kampen bout gets a crack at

Jim London, the good-looking

Greek.

Grebe to Battle Moore Tonight

(Continued from Ninth Page)

attract a few quarters into

Tommy's place.

Matchmaker Wad Wadham of

the Vernon club has offered Grebe

with the winner of the

Lemski-Collins bout on February

9, providing he defeats Moore to-

night.

Grebe could not fulfill this

engagement after he boxed

Tiger Flowers in New York's

bout in which his title will be at

stake—on February 26.

The champion is sold on Cali-

fornia. He says he's coming back

to the States, and he means it.

He also hints of retiring after an-

other year in case he does not lose

his title. "I've made over a mil-

lion dollars in the ring," admits

Grebe, "so I've got a lot of money."

I wished I had half of it now."

Dick Hoppe and Frankie

Pink will box the soul-wind-

up. It is for six rounds.

They weigh 155 pounds. Gene Ze-

dick and Joe Woods are

switched in for special event.

They are 155 pounds.

The two fours brings together

Jack Hurley vs. Bernard Wolfe

and A. Brown vs. Domingo Com-

peas.

MONTRÉAL ENTERS TEAMS

Montreal plans to send fifteen

teams to Utica, N. Y., for the an-

ual international Gordon media-

curling competition between the

United States and Canada, Febru-

ary 6.

DATE SWITCHED FOR FLORIDA 300-MILE SPEEDWAY CLASSIC

(EXCLUSIVE DISPATCH)

FULFORD (Fla.) Jan. 25.—The 300-mile auto race for \$30,000 scheduled to be held on January 26 over the new mile-and-a-quarter board bowl, now under construction, has been postponed until February 22, it was announced by Manager Ray Harroun. The postponement is caused by congested shipping conditions that prevented speedway buildings from receiving steel safety bands for the insides of the track.

The drivers, now in California, will come on here early in February to practice on what promises to be one of the fastest tracks in the country. It is banked 5 deg. steeper than any other track.

WALZ TACKLES ZORILLA

Santiago Zorilla will have a handfull of trouble ahead of him this evening at Culver City when he hooks up with Sammy Walz in the eight-round main event at the suburban club. The Panamanian has been taking his opponents in jig time order so far, but has met none possessing the ring craft that would be at the disposal of the New Englander. Sammy held the title of the New England State for a figure is a high-class card.

ROUNDING THIRD

by Hugh A. Jennings

USEFULNESS OF SUPERSTITION

Chapter 59

There were others noted for their superstitions. I remember one season when Ned Hanlon decided to discard his straw hat September 5. Hanlon refused to throw away the hat. He kept on wearing it, though, until September 20. The hat had lost its charm and Hanlon was forced to let it go. A week later, he had a new straw hat.

Bill Arnone, who managed the Detroit team before I took charge, always had a butterfly in sight when he went to the ball park. If there was a butterfly in sight when the game started Arnone figured it lost.

His players used to chase butterflies before each game, clearing the park of them. It was not a bad idea at that because the butterflies would get plenty of exercise.

PLAYERS SUPERSTITIONS

Personally I do not disapprove of superstition. One of the great things in base ball, rather one of the most necessary, is confidence. Without confidence no player ever succeeds. He must have confidence in himself.

If anything like a load of hay or a load of empty barrels, or one of the thousand and one things to which superstition is attached, is going to help develop confidence, a man should believe in the means.

It may be ridiculous to the layman and seem extremely silly, but it is invaluable to an amateur.

On the other hand, the pros are marked when Ad Santell, the world's champion, tips the beam at the Olympic Auditorium tipping the beam at the 1900, which he claims is his best winning tonnage. He will be a right weight to the weight which he carried about a year ago and says that he is now ready to go after any and all of the stars of the heavier division.

On the other hand, the pros are marked when Ad Santell, the world's champion, tips the beam at the Olympic Auditorium tipping the beam at the 1900, which he claims is his best winning tonnage. He will be a right weight to the weight which he carried about a year ago and says that he is now ready to go after any and all of the stars of the heavier division.

Both are ringwises, but that parallel is discarded when one thinks of the punching power of Spar. He has always made his man sick, and even Mandell's cleverness is going to be exercised to the utmost to keep out of harm's way.

Joe Salas and Sailor Paddy Mullins will stage a return bout in the six-round semi-wind-up.

They fought to a draw last time.

Carter and Kid Frayo, both punchers, are also natural right-handers.

Experts are going to throw a lot of money in the ring that Santell will be actioned in the main division when Ad Santell, the world's champion, tips the beam at the Olympic Auditorium tipping the beam at the 1900, which he claims is his best winning tonnage. He will be a right weight to the weight which he carried about a year ago and says that he is now ready to go after any and all of the stars of the heavier division.

Both are ringwises, but that parallel is discarded when one thinks of the punching power of Spar. He has always made his man sick, and even Mandell's cleverness is going to be exercised to the utmost to keep out of harm's way.

Joe Salas and Sailor Paddy Mullins will stage a return bout in the six-round semi-wind-up.

They fought to a draw last time.

LOCAL LAUGHS

Los Angeles Daily Times produces a film entitled "Local Laughs," consisting of 16 short scenes submitted by local people. Weekly prizes are paid of \$5.00 for the best scene, and a check for \$100.00 is given daily in a contest. The "Prize-winners" and addresses of winners, appear only on the screen. Jokes and stories mentioned will be given a place of honor on the screen. The comic strip "Local Laughs" will be published every day, and each of these contributors will receive a copy.

IMPORTANT NEW FINANCING OUT

German Industrial Securities Offered by Dillon, Read

Bonds of Baden Municipalities on Market Here Today

Congress Cigar Capital Stock Issue Announced

Important new financing, aggregating \$22,300,000, scheduled to be placed on the Pacific Coast market today, includes an issue of \$25,000,000 Rheinische Union twenty-year 7 per cent sinking fund mortgage gold bonds to be offered by a syndicate headed by Dillon, Read & Co.; an issue of 70,000 shares of Congress Cigar Company, Inc., capital stock, offered by Goldman, Sachs & Co., and an issue of \$4,500,000 Consolidated Municipalities external sinking fund 7 per cent gold bonds to be marketed by a Blyth, Witter & Co. syndicate.

The bonds of the Rheinische Union, due January 1, 1946, will be offered with non detachable stock purchase warrants at 94 and accrued interest to yield 7 per cent. The companies which form the Rheinische Union are the German-American Bergwerke, O.-Deutsch-Luxemburgische Bergwerke und Huetten, A. G., and Boekumer Verein Fuer Bergbau und Guetschafftsgesellschaft. This group is also known as the "big three."

The three companies are operated as a unit under intercompany agreements having over seventy years to run, and together constitute the largest coal-producing and iron-manufacturing unit in the old-established coal and iron industry of the Ruhr district. They are also one of the largest steel manufacturers and produce a more diversified line of highly finished steel products than any other manufacturer in Germany. During the year ended September 30, last, they employed an average of about 160,000 men.

SECURITY GIVEN

The bonds will be the direct, joint and several obligations of the three companies, secured by a closed mortgage on all of the fixed assets of each company subject to stipulations of 171,000,000 marks in underlying mortgages, including obligations under the Dawes plan based on the present assessment. Such fixed assets have been valued at more than \$22,400,000, including the value of coal reserves, and more or less than five times the sum of the bonds and all underlying mortgages.

Combined earnings of the three companies for the fiscal year ending September 30, last, after ordinary repair and maintenance charges and certain extraordinary charges for capital additions, improvements and heavy repairs, but before interest and profits tax, amounted to \$16,000,000, or more than three times the maximum annual interest requirements on the bonds on existing underlying mortgages and estimated maximum annual payments under the Dawes plan.

The municipalities are recovering the export trade which constituted such an important part of their business prior to the war. Combined exports during the year ended September 30, last, amounted to more than \$20,000,000, including export sales of about \$7,000,000 for reparations account for which payment is made in German currency.

STOCK WARRANTS ISSUED

A non detachable warrant will be delivered with each bond, entitling the holder, on or before January 1, 1946, to purchase one share, par value 100 reichsmarks per share, of the outstanding common stock of Deutsch-Luxemburg at the equivalent of 100 per cent of par, or \$12.80 a share.

The capital stock of the Congress Cigar Company, Inc., will be offered at \$40 a share. The company has been incorporated under the laws of Delaware to acquire the business of the old company, Congress Cigar Company of Pennsylvania, which was incorporated in 1898 in Chicago and has enjoyed steady progress from its inception. The company concentrates its efforts on the manufacture of one brand, the La Palina cigar.

Net profits of the company available for common stock in 1925 were \$1,731,750.05, as compared with \$1,178,262.12 in the preceding year, and net sales in 1925 aggregated \$1,178,262.12.

BADEN LIENS OUT

The liens of the Baden (Germany) municipalities, due January 1, 1931, will be offered at 93 and accrued interest, and will yield more than 7.62 per cent. The bonds will be the direct, joint and several ob-

OIL EQUITIES APPRECIATE

Long Pull Purchases of California Company Common Stocks Justified; Shares Multiplied

BY EARLIE H. CROWE

Certainly the long-pull buyers of California oil stocks have little reason for complaint. Investors who had the sagacity ten or eleven years to buy the common stocks of any of the leading companies, and the patience to hold on to the original purchase, have profited handsomely through the appreciation in the value of equities. As the appended table shows, the increases range from 150 per cent for Standard Oil to 1,127 per cent for California Petroleum.

Investing in equities is a popular topic in the security markets at this moment. The high levels to which most common stocks have advanced, especially those of the oil industry, can be attributed largely to the common stockholders who invested several years ago. Through the policies of ploughing earnings back into the corporation, the result of which is the creation of a large capitalization that probably conceals the actual value of the common stock equity. Undoubtedly the stockholders will realize on the exercise of options available in the value of the properties over a period of the next few years. Until that time, they will have to continue to ex-

cercise patience shown by some of the relatively new companies over Standard Oil, the traditional exponent of the equity building policy in the oil industry. Standard Oil's stock price, however, has been so numerous as to create a large capitalization that probably conceals the actual value of the common stock equity. Undoubtedly the stockholders will realize on the exercise of options available in the value of the properties over a period of the next few years. Until that time, they will have to continue to ex-

cercise patience shown by some of the relatively new companies over Standard Oil, the traditional exponent of the equity building policy in the oil industry. A Direct First Mortgage Public Utility Bond

We offer a limited amount of First Mortgage 30-Year 5 1/4% Gold Bonds, Series A, of the Western Gas and Electric Company, which serves 80 communities in Illinois. These bonds are secured by a direct first mortgage on all properties owned by the Company in fee and by pledge of all outstanding capital stock of two subsidiary companies.

Net earnings for the year ended October 31, 1925, were \$2,539,036, equivalent to more than 2.05 times the annual interest requirements on the total funded debt.

At the current price of 99 and interest these bonds constitute a thoroughly sound, high-grade investment with a yield of over 4.85%.

Descriptive circular upon request.

SHOWS EXTENT OF IRRIGATION

Interior Department Issues Comprehensive Map

Spread of Science Through World Indicated

Relative Progress in Various Countries Detailed

BY FREDERICK J. HASKIN
(EXCLUSIVE DISPATCH)

WASHINGTON (C. O.) Jan. 26. Irrigation, just friendly science that has made the life blood for his agriculture ever since he reigned his primitive head in the Valley of the Euphrates, has been mustered into world-wide service. This is shown in a recent publication by the Department of the Interior of a map showing the acreage of irrigated land in various countries. It is merely an estimate yet it may be used as a yardstick to demonstrate the extension of the science.

Irrigation has been extended to the four corners of the earth. Its canals run through 50,000,000 acres in Asia while 20,000,000 more are being worked in the United States. On every continent and in almost every nation needing it irrigation has been introduced.

Russia leads in Europe with 2,000,000 acres while Spain with 8,000,000, although Spain with 2,000,000 and Italy with 4,000,000 have both irrigation longer than France or Russia and both have developed systems that are unsurpassed.

ANCIENT DAMS

For instance, there is in Spain the Alcántara Dam on the Rio Manzanares. This dam was built in 1759 and is 110 feet long. At its crest it is 110 feet high and its capacity is 120,000 cubic feet. It supplies 2,000 acres with water. Likewise there is the Elche reservoir that has a capacity of 55,000,000 cubic feet while the Rio Segura is a dam twenty-five feet high that is said to be 400 years of age. It serves the surrounding area of 25,000 acres. The Lake Alcántara in the same neighborhood serves 27,000 acres.

In Asia, the Indus and Adda rivers form the nucleus for an excellent irrigation system. These rivers are fed by the Lakes Maggiore and Como and their flow is almost constant. At flood stage they are said to be a few feet above the sea level, five above the normal stage.

INDIA CANAL SYSTEM

Also India possesses the most perfect canal system in the world in her northern provinces. The Ganges and the Indus form an excellent base of operations for the great irrigation system. From the melting glaciers of the Tiansan and Himalayas there surges a vast flood of water in the greater part of India's canals.

Japan has begun to irrigate on a large scale and now has 1,900,000 acres being watered. Iran has 1,750,000, while Japan has 3,000,000. Australia has 1,900,000 and the Philippines but 150,000.

The United States has already been mentioned and it leads the Western Hemisphere but it is lagging in comparison with what is done in the rest of the Eastern Hemisphere are done.

In the New World Mexico is irrigating 4,000,000 acres; Chile, 3,000,000; Argentina, 2,000,000; Peru, 300,000; and Canada, 400,000.

Africa, the home of the Union of South Africa are the only ones worth mentioning, although irrigation is spreading to other parts of the continent. Egypt and its immediate environs have 7,800,000 acres under irrigation, while South Africa has 500,000.

The colonies and dependencies of the British Empire are showing the greatest advance in irrigation. In the Sudan, in Egypt, in the West Indies, in Malaya, in Ceylon, have been built new areas of land colonized and ones furnished with better water supplies.

NOTED CHARACTER IS HELD ON DRY CHARGE

RENO (Nev.) Jan. 25.—"Hand-some Jack" McEachern, the man who leaped into national notoriety years ago when he dynamited a mine tunnel with a corpus taken from a graveyard at Victor, Colo., to enable his wife to collect \$20,000 in life insurance, is held by his office in Oregon on charges of violating the dry law. Dry agents claim they caught McEachern operating a still in the mountains near Ely. McEachern is one of the most picturesque characters of the West and has faced many charges from bootleggers to murder. A few years ago while being returned to the Colorado penitentiary he jumped from a moving train near Tonopah and baffled a nation-wide search several weeks.

TAILORS TO BE SHOWN OLD-STYLE GARMENTS

ST. LOUIS, Jan. 25.—Clothing worn by men in the period from 1776 to 1826—150 years—will be exhibited at the seventeenth annual convention of the National Tailors' Association here Jan. 26th to 29th inst. The exhibit also will include tailored clothing worn by famous men. The garments will be insured and a police guard will be provided.

CITY RANKS HIGH IN MILK SURVEY

Angeles Dairies Score 95.4 in Surprise Test

Average Rating of State in Excess of 95 Per Cent

Local Record One of Highest Made in California

Results of a surprise milk score contest, just completed throughout the State by the Bureau of Dairy Control of the State Department of Agriculture, were made public yesterday.

The test showed that milk sold in Los Angeles lacks just a few points of perfection. The rating placed the local milk supply at 95.4 on the basis of 100 points maximum.

In announcing the results, Dr. George F. Parrott, chief officer, and Dr. William C. Duckworth, state veterinarian, stated that the mark is one of the highest ever made by any community in California.

The average milk rating for the state is in excess of 95 per cent, which is believed to be a record unbroken by any other state in the Union. The milk competition in Los Angeles was conducted in 100 one-and-a-half-gallon cans.

Dr. F. P. Wilson of the local office of the State Department of Agriculture, conducted the test under the supervision of Dr. Parrott and Dr. Duckworth.

The test showed that milk sold in Los Angeles lacks just a few points of perfection.

The results of the local milk supply in the state are as follows:

Los Angeles, 95.4; San Francisco, 95.3; San Jose, 95.2;

Sacramento, 95.1; Fresno, 94.9;

San Diego, 94.8; Oakland, 94.7;

Angels Dairies Score
12 in Surprise Test

Rating of State in
terms of 95 Per Cent

Record One of Highest
Made in California

Results of a surprise milk scor-
ing, just completed through-
out the state by the Bureau of
Control of the State Depart-
ment of Agriculture, were made
public yesterday.

It was observed that milk scor-
ing in excess of 95 per
cent is believed to be a rec-
ommended by any other
in the United States.

The results con-

clude in Los Angeles per mil-

lions of half pints a day.

Dr. M. E. Mc-

and C. U. Duckworth, mar-

ket specialists of the bureau,

P. P. Wilson, of the De-

partment of the state conducted the test

with the assistance of Dr.

and Dr. Velt.

NOT SO PARTICULAR

The man who brings home the bacon doesn't often wait to have it wrapped up in waxed paper.

KEEP BUSY

The man who thinks to live on hope is likely to meet despair at the next crossing. The man who waits upon himself in the only one sure of service.

SILENCE BE:

A country newspaper makes mention of "three silent blasts of the fire whistle." What we need here is a few silent sirens for the police and fire departments.

SOUTH AMERICAN TRADE

The city of Rio Janeiro is buying about \$200,000 worth of motor busses from English manufacturers. Of course, this is not a vast contract as orders go, but how was it that the trade athletes of Detroit weren't on the job?

ROMANCE AND BUGS

A professor of Minnesota University has returned from an extended exploration of the South Sea Islands. He says that there is no romance in that section any more. All the glamour has gone. But, anyhow, he brought back 12,000 insect specimens with him and some of them are new to the entomologists. It is possible that a guy who is busy rounding up 12,000 bugs wouldn't have much time for romance. He would hardly be able to see it.

AMONG THE FOGS

The fog in the northern part of the State have been unusually thick of late. One might sit on the hotel porch and imagine himself in the densest part of London. At times it was feared that workers might have to use picks in order to get the street cars through. Many a soul in starting off for work in the morning will kiss the wife farewell and throw his fog shovel over his shoulder. The oldest inhabitant asserts that the fog this season have been longer and thicker than any known since the days when free silver was an issue.

PAINTED LADIES

A preacher arises to protest against the brides who come to him with painted faces. He says he will not officiate at a wedding where the complexion is buried under cosmetics. The average city girl will declare that he ought to be a hermit. At most weddings the bride doesn't need much rouge, but if she thinks it would lend color to the occasion she is apt to smear it on. The day is past, however, when virtue can be slain with a lipstick. Of course, there are many prim persons who think a maid can hardly be decent under a coat of rouge, but the facts are against them. There are numbers of powdered damsels as stainless as Diana. The girls are not using as much decoration as they did last year, but it is not because virtue is triumphing over vice. They either need the color less or it is less fashionable.

PERILS OF PROSECUTION

A Federal Judge declares his willingness to shoot any prohibition officer who comes browsing around his home without a warrant and a United States District Attorney announces his purpose to prosecute any Federal agent who enters a home on hearsay evidence. The Constitution does not say that a man's home is his castle, but the average American has become thoroughly imbued with that sentiment. To him it lives inviolate—and he has reared his house accordingly. He doesn't think that any policeman on earth has the right to come into his lair and taste his grape juice or smell his way through his medicine chest. Every now and then authorities sustain this attitude. If a man may keep a fagot of bitters in his home and his house be proof against invasion it is difficult to guarantee a bone-dry country.

THE TIE THAT BINDS

According to the compilations of the Interstate Commerce Commissioners, there are over 50,000 miles of first-class railway construction in this country that is being operated at a net profit of less than 3 per cent. Some of it is not earning 1 per cent and on some there is a dead loss. While the railway situation is excellent so far as the grand totals are concerned, there are numbers of important lines that are not returning a profit justifying their operation. They are really essential for the welfare of the territory through which they pass, but if they are losing money the stockholders cannot be expected to maintain them without some change in the conditions. That is why consolidation and combination are made necessary. At one time the government sought to prevent these amalgamations by law. Now it is proposed to compel them by law. The railroads must be operated so that they can meet motor competition and, therefore, combinations that will reduce mileage and cut out excess costs have become vital. If the railroads are to live there must be less harrapping by politicians and more observation by experts.

THE COLORADO RIVER MUDDLE
The great project to control the Colorado is muddled by such a medley of conflicting desires and schemes that the earnest and honest advocate of river control finds himself uncertain of the best course. The warring factions have presented plans and counter-plans to a point where agreement seems continually remote and the many-sided clamor interminably delays consummation of the enterprise.

It is more a clash of opinions and ambitions than anything else. Any apparent conflict of interest is more fancied than real for the reason that the controlled river will furnish more water than can possibly be used by all parties concerned and more power than the market will be able to absorb for generations to come.

Arizona refuses to ratify the River Commission and ratified by the six other States directly involved. Senator Johnson and Congressman Swig seek to save their bill or enough of it to meet their political needs.

Arizona representatives say the enactment of the bill would merely be "voting a law-suit." The upper basin States, all of which ratified the Santa Fe compact, are militantly on the alert to protect their States against the Arizona move and against the efforts made to modify the compact. Individuals and organizations are clamoring on behalf of side issues.

Now Secretary Work has proposed a general plan in which he seeks to protect all the interests involved and to form a new basis upon which constructive work can be done. There seems to be little overt antagonism to his general proposal but the scheming and heckling continue.

It is deplorable and unprofitable to an incalculable degree that the most important and most necessary constructive enterprise now before the people of the Southwest is thus being held up. There is one point on which there has never been any disagreement and that is that the completed project would tremendously enrich the Southwest and the nation at large. It would yield returns many times greater than the investment.

Great and meritorious though the undertaking be, it is the deplorable fact, nevertheless, that it is being blocked year after year by unscrupulous men who wish to keep the controversy alive for their own political benefit; by self-seekers who care more about their private schemes than the public good and by uninformed men honestly misled by the clamorings of the politicians.

Any one of the several factions would be justified in surrendering something of its claims for the sake of getting the work begun and finished. Every one involved, if he is patriotic and really seeking the good of his own constituents and of the community at large, should be willing to subscribe to a program of compromise, if necessary, to achieve results.

When the Colorado River Commission, headed by Secretary Hoover, reached an agreement on the Colorado River compact at Santa Fe several years ago The Times commanded and endorsed it, saying at that time that perhaps none of the interests involved secured all it would like in the agreement but that it seemed to be a fair and equitable working plan which would refund to the profit and advantage of all concerned.

An agreement now, along the general lines of Secretary Work's proposal, would be in the same category. Perhaps every community could not get everything it desired, but every one would certainly be enriched and none would suffer.

The long-drawn-out controversy has become a liability to the Southwest. The consummated project to control the river would constitute an asset worth billions of dollars and would undoubtedly do more to build up and make prosperous this great southwestern empire than anything that has ever been accomplished before.

So let good sense reign that we of the Southwest may enjoy our magnificent heritage instead of being in a perpetual state of bickering over it.

THE BITTER END'

The "bitter-enders" have finally reached the bitter end. They talked until the Senate was forced to bandage their mouths. Their object was not to convert, but to obstruct. It became necessary to silence them to permit the ordered course of government to continue. They have played their last trump and have lost the game and the rubor. All that they have won is the lasting contempt of the great majority of the people of the United States. They were not willing to play the game fairly and they were forced to submit to a just penalty.

No one can with honest intent accuse the majority of precipitate action, with trying to rush the World Court resolution through the Senate. The resolution had been before that body for three years. During all that time more than two-thirds of the Senators were willing to vote for its adoption; but it was blocked by a running filibuster.

During the last three weeks nineteen Senators had held the floor almost continuously. They talked in relays and one of them boasted that they were prepared to hold the floor for the remainder of their terms. The only just criticism of the Senate is that it did not invoke the cloture two and a half years ago.

The way is now cleared for the early adoption of the resolution. All that can be said against it, within reason, has been said and resaid. But it has not carried conviction. The people of the country have seen the World Court function for more than three years; and there has been nothing in its record to cause a citizen to view it with alarm. It is an institution created by the League of Nations; but the League itself is an institution that this country, through its President, probably did more to create than any other.

Senator Johnson has predicted that entrance into the World Court will be followed by entrance into the League of Nations. He admits the total collapse of the campaign of the bitter-enders. He has seen the country turn against them and he is filled with gloom. But while he frowns the rest of the country is smiling. No single act of this country since the armistice has done so much to win the confidence of other peoples as joining the World Court will do.

It is taken as an earnest that we do not intend to use the pressure of our great wealth and power in dealing with other peoples; that we ask only justice and that we are willing to grant the same need of justice, even to the weakest, that we ask for ourselves.

Perhaps this is but the first step. Per-

haps this country shall determine later to join the League of Nations. That question

Caught in the Act

THE TOOTERS

"Give me seven or nine musicians and the rest of the sixty can too," said John Philip Sousa, the New York baton master, who was in Los Angeles a few days ago.

The world is full of jive tooters; but musicians are very scarce. Orchestras are overruled with fiddlers; but violinists are not plentiful. There are cities full of men in business; but business men are hard to find.

Business as much as religion requires seers; and these worthies come but a very few in a generation.

Given a "Red" Grange or a George Wilson on a football team and the others may just be players! One or two can inspire mediocrity with genius.

One man in 100 sets the pace; the others just jog along. Most folks are too indolent to choose either the road or the speed. They are mere trailers, going where the crowd surges.

There are funeral processions headed by dead ones that are not to be interred. The highway is cluttered up by slow pokes going no place in particular.

Too many people in this world are like the dog on the train that chewed up its tag. They have no place in view and they are on their way. They just toot in the band; they just fiddle in the orchestra; they just draw their wages at their work.

The future holds nothing in store. They have never budgeted their lives. A merry-go-round furnishes as much travel as they can take. There is no destination in ideals or work.

A pack of asses headed by a lion may do greater execution than a pack of lions led by an ass.

This is a tough world and probably there is only one radio announcer really as genial as he sounds.

Russia's form of government is nobody's business; it's her form of honesty that troubles neighbors.

If only this thrifty feeling you have weeks after Christmas could be retroactive.

The farmer is lucky, at that. If he were more prosperous government would begin to regulate him.

We trust Gen. Butler didn't imagine anything personal in the meaning of the Liberty Bell.

But when we were told that the race of the Nord

Is destined to rule all creation.

The pride that we fancied was lost was restored.

And we thrilled with tumultuous elation. We walked through the streets with an arrogant smile.

Although we concede, it was wrong to. Read all the people we met along the way.

Despite our most earnest endeavor.

We did not bark back to a puerile past.

So we could not acclaim us,

No wealth had our ancestors ever amassed.

There was nothing to render us famous.

So for long we sat down in our lowly thatched cot.

Resigned to be classed with the common-people lot.

But when we were told that the race of the Nord

Is destined to rule all creation.

The pride that we fancied was lost was restored.

And we thrilled with tumultuous elation.

The Nordic, far back in the days of his pride,

Was an able, a great and a brave man;

But the last of the lot, so these follow say,

died.

Just after the time of the cave man.

And so we are forced to abandon all claim

To so much as the distant reflection of fame.

AS DIVERTING FILM

By Edwin Schallert

Married life, as portrayed on the screen, returns to the realm of real humanness in "The First Year" this week at the Criterion. The picture version of Frank Craven's popular comedy of the stage in many ways seems almost as good as the original. Even if you saw the spoken drama I'll venture to say that you'll find the film production, with its joys and tribulations of a young wedded couple, a source of capital enjoyment.

The comedies of film do not lack in variety that have shown lately have been forced and artificial in their effort to provide comedy. I refer particularly to pictures like "Ex-Convict of White Collar Crime" or that ilk. But "The First Year" is as natural as life, and incidentally thoroughly refreshing and amusing.

The audience appreciated so much, indeed, the sparkle and sympathy of the situations that the majority probably forgot that they were looking at a picture and were instead intrigued by the idea that they were witnessing events akin to those in their own daily wedded life or in the lives of people of their acquaintances.

Frank Borzage, who always has a great fund of humanness, and a good knowledge of what might-happen-to-me-and-me sort of incidents, directed "The First Year," and the cast that was selected to play it might be described as almost ideal. Matt Moore is the youthful Tom, "Tom" Kathryn Perry the wife, and John Patrick the other man, not to speak of J. Farrell MacDonald, Margaret Livingston, Frank Currier, and others who also pass muster. It is a picture that amuses as anybody too in Carolyne Snowdon in her characterization of the colored maid who very nearly wrecks the dinner party that is to sit in important business deals of the husband.

Moore's portrayal is characteristic. He has been the somewhat backward hero for a long time—while the rest of us have been riveting Craven in a role that Craven made entirely his own on the stage, for his performance is better even than his very worthwhile record in such impersonations as those in "The Man in the Moon" for entertainment, but until the courtroom sequence flashes of the screen it is a pretty weak and wishy-washy affair.

Miss Costello has personality of definite power. In view of the fact that she has been widely heralded as a find, one would expect the edge to be taken off her debut to some extent, I believe, that James Cruze was its director. Combined it is with an amateurish amateurish revival at Gramma's Metropolitan Theater, in which the settings are alluring, and some of the singing and dancing acceptable, it has, possibly, the chance to make a good impression for entertainment, but until the courtroom sequence flashes of the screen it is a pretty weak and wishy-washy affair.

Miss Marion has personality of definite power. In view of the fact that she has been widely heralded as a find, one would expect the edge to be taken off her debut to some extent, I believe, that James Cruze was its director.

The "Kleen and Warne" married life series has quite evidently established herself as a splendid type for these domestic comedy portrayals. She has both warmth and comedy, and a charming naturalness as Mrs. Tucker. The cleverest scenes in the picture is the one where she becomes involved in a quite unexpected flirtation with the married man as played by MacDonald.

It is curious that the inspiration scene, which was very funny on the stage, is less amusing on the screen but the dinner party is more hilarious. As a whole the adaptation follows very faithfully the original, and is credited to the expert pen of Frances Marion.

Frank Coolen and Virginia Medison are too in supporting parts particularly cool.

Except for the organ solo by Leonard Clark, and some scenic glimpses, the rest of the bill offers little to interest, but "The First Year" is worth while.

"MANNEQUIN" BRINGS PROMISING TALENT

Except for the fact that it brings the sensitive and slower-like Dolores Costello to light the silver screen for the first time, "The Mannequin" adapted from Fann Hurst's prize story, will not conjure any wild outbreak of enthusiasm.

No picture directed by Cruze can be entirely dull, and though this is a low ebb for him, there are moments where his faculty for telling a story effectively, requires a certain typical intensity.

The screen play was written by Frances Agnew, with Walter Woods doing the adapting.

It is curious that the inspiration scene, which was very funny on the stage, is less amusing on the screen but the dinner party is more hilarious. As a whole the adaptation follows very faithfully the original, and is credited to the expert pen of Frances Marion.

Frank Coolen and Virginia Medison are too in supporting parts particularly cool.

Except for the organ solo by Leonard Clark, and some scenic glimpses, the rest of the bill offers little to interest, but "The First Year" is worth while.
